STEPS FOR GIT:

STEP 1: Create a New Git Repository locally

i. Open a Terminal or Command Prompt.

ii. Navigate to the desired directory where you want to create your new repository:- cd path/to/your/directory

iii. Initialize a new Git Repository with name as Enrollment No.:- git init Enrollment No.

STEP 2: Create a New Folder

i. Create a new folder for your project(e.g:- "Assignment1" and "Assignment2"):-

mkdir assignment1

mkdir assignment2

STEP 3: Add and Commit changes

i. add the new files or folders to the staging area:- git add.
